Tender – Engineering Services – Various Capital Projects

**Addendum # 3**

**Issued – January 24, 2020**

Please see the following questions and answers for additional information to the above noted Tender.

**Question 1**

Page 13: 3.1 Topographic Surveys - are we to assume there is no up-to date surveys at any of the location of these project and we are to carry price for full surveys?

**Answer 1**

Correct. The City does not have up to date surveys.

**Question 2**

Page 13: 3.1 Large Storm Culvert Inspection, it does not have a number or location of culverts. Please advise.

**Answer 2**

The list of culverts were provided in Addendum #2.

**Question 3**

Street upgrade Pond St.: is this conceptual drawing available for review?

**Answer 3**

Yes. Please see the attached drawing entitled “Pond Street Concept” for the conceptual drawing of Pond St.

**Question 4**

During the design Phase will the consultant be responsible for public consultation?
Answer 4

At this time, there are no plans for public consultation. If consultation is necessary, the City will negotiate with the proponent at that time.

Question 5

I did not see it noted but will CCTV of existing storm sewer and sanitary sewers be provided to the successful consultant or will the consultant be expected to provide this service to support the detailed design under this proposal engagement?

Answer 5

The City has no updated CCTV footage. Please expect to provide these services as part of your submission.

Question 6

I did not see it noted but will geotechnical investigations for the street reconstructions and new road construction be provided to the successful consultant or will the consultant be expected to provide this service to support the detailed design under this proposal engagement?

Answer 6

The Proponent shall include any geotechnical investigation costs necessary to properly complete the work.

Question 7

For the sidewalk and multipurpose pathways project, there was not a construction year outlined. Will this be required for 2020 or 2021?

Answer 7

All work is anticipated to be tendered for construction in 2020.

Question 8

For the pedestrian crossing improvements project, could you please clarify the crossing at Great George Street at Fitzroy Street? I may be missing something, but the two streets don’t seem to intersect.

Answer 8

Please see the map for location of the crossing.
**Question 9**

We also wondered if traffic counts would be provided along University Avenue and at the Longworth/Euston intersection or will the successful proponent be required to provide.

**Answer 9**

The proponent shall expect to complete all traffic counts necessary to complete the work.

**Question 10**

For the Grafton St - MECL location indicated in Addendum #2, we suspect the 1200-1500mm storm system and outfall generally located as shown in the sketch below is the one to be inspected. Please confirm.
Answer 10

Yes, that is correct. It’s the Proponent’s responsibility to confirm the length and location.

Question 11

Does the City have any recent traffic count data to provide to the successful proponent for the following project sites: Ken’s Corner; University Avenue between Belvedere and Euston; intersection of Towers Rd/Mall parking lot; and the intersection of Norwood and Oak Dr?

Answer 11

No, the City does not have this information.
Question 12
Does the City have any pedestrian count data for the Great George/Fitzroy intersection that will be provided to the successful proponent?

Answer 12
No, the City does not have this information.

Question 13
Please provide the complete list of culverts, including locations, pipe sizes, and material types. For the outfalls, please clarify the extent of the structure to be assessed.

Answer 13
The list and location of culverts we provided in addendum #2. The City has no future information on these pipe and is the rationale behind this work. When inspecting the outfalls, the Proponents should also inspect any retaining walls and grassed or rocked slopes for stability concerns.

Question 14
Clause 3.2 of the RFP indicates a project completion date of July 31, 2020. Does this include design/tender of all projects? If not, please clarify which projects this date applies to.

Answer 14

Question 15
For the Garfield St. upgrade project, please clarify the easterly project limit (Health PEI is somewhat vague).

Answer 15
The limits of work for this project shall be from Kensington Rd. to Walker Dr., approximately 440m in length.

Question 16
The work scope for the University Avenue Master Plan includes ‘burying utilities’. Please clarify what is intended for this. Does this apply to the entire ~1.7 km segment of University Avenue?

Answer 16
Yes, for this work, please assume all utilities are buried in conduit for the entire segment of roadway.
**Question 17**

For the sidewalks on Arcona/Messer/Yorkshire and Johnston, please indicate which side of the road the City anticipates building the sidewalk on.

**Answer 17**

The locations for the new sidewalk shall be as follows:

Arcona Dr. – North side of road  
Messer Ave. – East side of road  
Yorkshire Dr. – West side of road

**Question 18**

Does the Passmore Street project involve the sidewalks on both sides of the street, or just one side?

**Answer 18**

Yes, the sidewalk on both sides of the street should be included in this work.
